message from

DOCTOR MOHAN

I hope you had a fabulous holiday season and are ready for an exciting 2012!

Late November I went to Vancouver for the CAAM conference which is dedicated to the Canadian Aesthetic industry. Many doctors share their stories and experiences with new treatment protocols and new techniques.

New areas being treated with Dermal Fillers are the Nose and Earlobes. Hand treatments are also becoming more popular.... as we are all aging. Watch out for some Fat treatments that are giving promising results!

I would like to introduce you to Sculptra, the modern age of anti-age. This treatment is fabulous for those 40-60 years. If you are interested in learning more about Sculptra, I would be pleased to meet with you.

Please be sure to visit www.nulookmedspa.com for our monthly specials and our surprise **on-line only specials!**

I look forward to seeing you, and remember to always face your world with confidence!

Sincerely,
Dr. R. Mohan, MD

Note on Groupon, Living Social, WagJag in the Medspa Industry

It seems that many of these discount sites are coming out of the woodwork. My concern is that many of these establishments are misdiagnosing, mistreating and not providing enough education to their clients. Lasers can be dangerous if used on the wrong skin type or mishandled in any way. Please remember to ask questions, do your own research and be mindful, this is your health! Don't risk it!

Rosacea affects many of us!

Rosacea is an inflammatory skin disease that causes redness, which may come and go. The skin will appear red and at times pimples may appear on the nose, cheeks, chin and/or forehead. There several triggers, however, the most common are;

- Alcohol
- Spicy food
- Stress
- Exercise
- Over heating (sun, bath or shower)

Rosacea may be treated and controlled. Please do not hesitate to contact us in order to learn more.

ENTER TO WIN CONTEST

ON THE NULOOK MEDSPA WEBSITE

Congratulations to Suzy D & Lisa S & Christine J!

Our January, February & March 2012 winners!

Please note that we will be **drawing a winner every month**, so be sure to enter!

health tip

FROM VANJA & MICHELE

▶ HYDRATING YOUR SKIN

It is a myth that drinking 8 cups of water a day is what hydrates your skin. Water does in fact hydrate ALL organs, but when it comes to your skin, it dilutes the damaging acids on the skin's surface.

In order to properly hydrate your skin, you need a good moisturizer that is not full of artificial 'fillers'....and then of course protect it with sun block.

*We offer Laser Hair Removal that is virtually painless!

*For those of you who are more sensitive, our office can provide pain management, just let us know.

We are here to answer all of your questions and to help suit you with the best products and treatments for you and your skin!
