OCTOBER SPECIALS

LASER HAIR REMOVAL SPECIAL - Purchase 6 treatments 25% off or Purchase 8 treatments 30% off.

Laser hair removal is one of the top five most popular cosmetic treatments in the medical spa industry. Thousands of men and women choose this long-lasting hair removal method every year to get rid of unwanted facial, chest, arm or leg hair. Excessive hair growth can be caused by hormonal shifts such as puberty, pregnancy, and menopause, but hair growth patterns can also change due to medications, hormone replacement therapy, health conditions and genetics. No matter the cause of your excessive hair, laser treatment is a great way to stop hair from growing in unwanted places. Fall is a great time to start a session to be hair free for Summer 2021!

Non-ablative, on the other hand, has very few side-effects and requires almost no healing times, but involves numerous treatments over many months to achieve only modest result.
