DROP THE RAZOR INVEST IN LASER Buy One get One Laser Hair (min purchase 2 sessions)

If you're not happy with shaving, tweezing, or waxing to remove unwanted hair, laser hair removal may be an option worth considering. Laser hair removal is one of the most commonly done cosmetic procedures. It beams highly concentrated light into hair follicles. Pigment in the follicles absorb the light. That destroys the hair.

PRP PLATLET RICH PLASMA UNDER EYE FILLER SPECIAL

\$1050 for 1 PRP & FILLER \$2000 for 2 PRP & FILLER

The under eye area may have a hollowed look due to genetics, volume loss due to aging, or from environmental and health factors such as excessive sun exposure, or habits such as cigarette smoking that can affect the skin internally and externally. Hollowness can affect the whole under eye area all the way to the upper cheeks, or just the small area directly below the eyes called the tear trough. Hollow eyes can be effectively treated with Hyaluronic acid, the primary material most commonly used in modern cosmetic fillers, which occurs naturally in the body, is safely metabolized with time, and is hypoallergenic. Effects last 1-2 years respectively.
